

Instructor: Jun Yi

Due: 11/24 11:00 pm

Design a function `int ILoveDataStructure()`

Input: your panther ID. Note your function should have an input parameter to receive the panther ID.

Output: if your panther ID has more even numbers than odd number then print " Now I am an expert using Data Structure!".Otherwise, print "I will get an A+ in the final exam"

For example,

input: 002478935

output: Now I am an expert using Data Structure!
